EXCEPTIONAL DENTISTRY

All-On-4® Technique *Now Available*

PATIENTS SUFFERING FROM DENTURES OR CRUMBLING TEETH benefit greatly from this new procedure

“All-on-4®” is a new scientifically proven breakthrough in Dental Implants that allow denture wearers and those suffering from ailing and failing teeth to have new solid teeth implanted in 1 day. Imagine a return to the freedom to smile, laugh at will, and enjoy a quality of life that you felt was gone forever! My “All-On-4®” procedure gets you back to living life to the fullest in as little time as possible.

Extreme fear of the dentist, missing teeth, teeth that are a complete mess, ongoing tooth loss, social, dating and sex life embarrassment, dentures that don't work, loss of self-esteem, the feeling of being incomplete, problems eating and speaking, worsening medical conditions because of poor nutrition and inadequate digestion of food: all of these problems can be solved with our special methods of dentistry. “All-On-4®” is the fastest way to get from one of life's most frustrating conditions back on the road to dental health and wellness again.

Every dental patient benefits from “All-On-4®” technology. Even those who are not ideal candidates for the procedure still have reduced treatment time for EVERY dental implant procedure. Procedures that once took months to complete can now be condensed into a matter of hours or days thanks to CT scans, 3D modeling and computer aided design. We are proud to be pioneering doctors in Central Texas bringing these advancements to the general public and for the benefit of our patients.

There is 1 major problem with this technique. This problem involves how long one waits before deciding to move forward with this type of care. The longer you put off a consultation and treatment, the greater your chances of not being eligible for this new “All-On-4®” procedure; quite literally the clock is ticking. If you want to benefit from these latest advances, the very best thing you can do for yourself is come in for a 30 minute complimentary consultation to discuss your options as fast as you possibly can.

INTERNATIONAL ASSOCIATION OF PHYSIOLOGIC AESTHETICS

To let you see how life changing the dental implant technology is, we have included photos of our patients who at one time felt that they couldn't be fixed; but now are living every minute of life to the fullest again. Take one look and you can dramatically see how their lives were completely changed after experiencing Dr. Reece and Dr. Jouett Exceptional Dentistry. They went from thinking there was no hope to finding out that they still had a workable and permanent solution to get back what they had years ago but the ravages of time or accidents took away.

GOOD NEWS! WHO WANTS TO LIVE LONGER?

One of the things we've learned just in the past few years from new medical studies is that you may **LIVE UP TO 10 YEARS LONGER** just by having a healthy mouth! Patients that have diseased mouths **DIE** sooner and have more heart attacks and strokes. Getting your dental health back extends your years. . . but there is bad news.

AND THE BAD NEWS

With this new scientific information, we know that as your dental problems get **bigger** and your number of options shrink, your risk for dentally related heart attacks and strokes keeps growing. The sooner you get back your dental health, the sooner you can begin to reduce these dental risks to your own health for years to come.

PERMANENTLY
SOLVE SERIOUS
DENTAL
PROBLEMS

YES, IT IS EXPENSIVE TO GET BACK WHAT YOU'VE LOST: BUT YOU REALLY CAN'T AFFORD NOT TO!!

The truth is that "All-On-4®" and dentistry that permanently solves serious problems is expensive. However, this is one investment that will literally pay dividends to your physical and mental health and well being 24 hours a day, 7 days a week, forever. And if that isn't enough you will likely live to enjoy these benefits even longer. How many other things can you spend your valuable money on that comes close to delivering those same promises?

THE BEST DAY IS TODAY

Knowing all of the these things, why would any patient put things off while knowing that "All-On-4®" and other new advancements in dental implants are possible? Here's why: It is human nature to stubbornly resist change, even when it will profoundly benefit your whole life and health. Outwardly, of course, you make excuses that attempt to justify why it isn't a good time to take action to regain your dental health just now. The most common one is "the time is not quite right." Someday, you insist: "When all the pieces of my life fit perfectly together, I'll be in a better position to take action – and get back my ability to eat comfortably and smile again." You are only fooling yourself with that phrase...it is like thinking that someday your train will arrive at this picture perfect station at the end of the line and then you can do all the things you have meant to get done. That day never arrives **UNLESS** you take action. The reason that most patients get caught up in this delusion is they don't know "how" to take the first step. **Your first step is a 30 minute "talking" consultation** in our office to briefly discuss the benefits of "All-On-4®" and other advanced options for your

individual situation. Yes, making the appointment for the first visit is hard **BUT** not impossible. And, of course, the 30 minute "talking" consultation is complimentary to find out what new technique best provides a solution for you.

PLEASE DON'T MISS THE OPPORTUNITY
to take advantage of the latest in treatment options
and most importantly, **don't allow yourself to become a patient that
even we couldn't help.**

Keep your hope alive.

Call Kimm at **979.846.6515** right now to further discuss how you can
get your dental health back and once again look and feel as special as
you really are.
